Microsoft since 2010

- Worked with Microsoft Azure in different roles at Microsoft
- Speaker and technical trainer since 2012

Microsoft mission

Empower every person and
every organization on the
planet to achieve more

Create more
personal computing

Interconnected Ambitions

Build the intelligent
cloud platform

Reinvent productivity
& business processes

Getting started with Microsoft Azure – from Virtual Machines to Serverless Services

Microsoft Azure

Azure regions
around the world
enable worldwide
presence

An Azure Datacenter from the outside.

A photograph showing the interior of a large datacenter. The space is filled with rows of white server racks. The ceiling is high and features a complex network of metal beams, pipes, and electrical conduits. Bright fluorescent lights are mounted on the ceiling, illuminating the area. The floor is a polished, reflective surface. In the background, more server racks and some equipment are visible.

An Azure Datacenter from the inside.

Azure Datacenter scale

Choice + Flexibility

Compute Storage Networking Security

Hybrid

Platform Services

Security & Management

-  Portal
-  Azure Active Directory
-  Azure AD B2C
-  Multi-Factor Authentication
-  Automation
-  Scheduler
-  Key Vault
-  Store/Marketplace
-  VM Image Gallery & VM Depot

Services Compute

-  Cloud Services
-  Service Fabric
-  Batch
-  RemoteApp

Integration

-  Storage Queues
-  BizTalk Services
-  Hybrid Connections
-  Service Bus

Media & CDN

-  Media Services
-  Content Delivery Network (CDN)

Web and Mobile

-  Web Apps
-  API Apps
-  Mobile Apps
-  Logic Apps
-  API Management
-  Notification Hubs

Developer Services

-  Visual Studio
-  Azure SDK
-  VS Online
-  App Insights

Data

-  SQL Database
-  Data Warehouse
-  DocumentDB
-  Redis Cache
-  Azure Search
-  Storage Tables

Analytics & IoT

-  HDInsight
-  Machine Learning
-  Stream Analytics
-  Data Lake
-  Data Factory
-  Event Hubs
-  Data Catalog
-  IoT Hub
-  Mobile Engagement

Hybrid Operations

-  Azure AD Health Monitoring
-  AD Privileged Identity Management
-  Domain Services
-  Backup
-  Operational Analytics
-  Import/Export
-  Azure Site Recovery
-  StorSimple

Infrastructure Services

OS/Server Compute

-  Virtual Machines
-  Container Service

Storage

-  BLOB Storage
-  Azure Files
-  Premium Storage

Networking

-  Virtual Network
-  Load Balancer
-  DNS
-  Express Route
-  Traffic Manager
-  VPN Gateway
-  App Gateway

Datacenter Infrastructure

Storage in Microsoft Azure

Storage in the Cloud

<div>RDBMS in VM</div> <div>SQL Oracle MySql</div> <div></div>	<div>SQL Database</div> <div>Basic Standard Premium</div> <div></div>	<div>DocumentDB</div> <div></div>	<div>Table Storage</div> <div></div>	<div>Blob Storage</div> <div></div>	<div>Files</div> <div></div>	<div>Disks & Drives</div> <div></div>
RDBMS		NoSQL (Dok)	NoSQL (K-V)	BLOB (Block/Page)	Filesystem	
3 x redundant Data Storage						
TDS		RESTful			NTFS	
<ul style="list-style-type: none">• Full SQL Functionality	<ul style="list-style-type: none">• Auto-Scaling and Clustering• Max DB-Size: 1 TB	<ul style="list-style-type: none">• Object-Database• Semi-structured JSON Objects	<ul style="list-style-type: none">• NoSQL-DB• Large, Semi-structured Data	<ul style="list-style-type: none">• Large binary Data (Videos, Images, Audio, ...)	<ul style="list-style-type: none">• SMB File Share for VMs• Based on Blob-Storage	<ul style="list-style-type: none">• Persistant FS for VMs and Cloud Services• Based on Blob-Storage

Compute in the Cloud

Azure Services for your applications

IaaS

PaaS

Virtual
Machines

Service Fabric

App Services

Functions

Virtual Machines

Windows, Linux, ...

Azure Container Service

Run your container infrastructure

Azure Container Services

Standard Docker tooling and API support
Apache Mesos, Docker Swarm, Kubernetes
Linux and Windows Server containers
Azure and Azure Stack

Service Fabric

A scalable Microservice Platform

Azure Service Fabric

- Many micro services per VM
- High density
- Fast deployment of updates
- Scale micro services fast

Azure App Services

Azure App Service

Build and scale great cloud apps

=

Web Apps

Mobile Apps

Logic Apps

API Apps

Benefits of App Services

Automatic OS patching

High availability

- **Automated scale out/in**
- **Built-in load balancing**

Supports many languages and platforms

- **.NET, Node.js, Python, Ruby and many more**

Easy continuous deployment

- **Continuous delivery from third-party source control providers**
- **Built-in Git repo**

Auto-load balance, Autoscale, Geo DR

Virtual networking and hybrid connections

Site slots for staged deployments

Web Apps

Web apps run as they are - no changes required

Azure Functions

Going serverless

What is Azure Functions?

Code Azure Functions Events + data

Supported Languages

1st class support

- Node / JavaScript
- C#

New languages in preview

- F#
- Python
- PHP
- Batch
- Bash
- PowerShell

Supported bindings (5/2016)

Type	Service	Trigger	Input	Output
Schedule	Azure Functions	✓		
HTTP (REST or WebHook)	Azure Functions	✓		✓
Blob Storage	Azure Storage	✓	✓	✓
Queues	Azure Storage	✓		✓
Tables	Azure Storage		✓	✓
Tables	Azure Mobile Apps Easy Tables		✓	✓
No-SQL DB	Azure DocumentDB		✓	✓
Streams	Azure Event Hubs	✓		✓
Push Notifications	Azure Notification Hubs			✓

Demo: Function Apps

Servers when you want them...

Servers when you want them...
serverless when you don't

There is more...

Azure Cognitive Services

Add the power of machine learning to any app

Process images, video, speech, language and more

Simple REST APIs

Language

Speech

Vision

Search

Knowledge

Azure Bot Service

Conversation as a Platform

Skype, Slack, Facebook Messenger, Microsoft Teams, ...

Automatically scale with a serverless architecture

Azure Meetups
