Thing on the Internet?

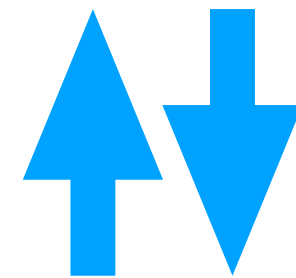

“Internet of Things” is not about having a little Arduino box fetch the TV schedule and sounding an alarm when your favorite show is coming on.

That is cool, but it’s just a thing on the Internet.

Clemens Vasters

<https://blogs.msdn.microsoft.com/clemensv/2014/01/26/internet-of-things-or-thing-on-the-internet/>

Thing on the Internet

Those things are things on the Internet. They're the long oxidized fuel of the 1990s dotcom boom and fall. Technically and conceptually boring. Islands. Solved problems.

**The “Internet of Things” isn’t really
about things.**

It’s about systems.

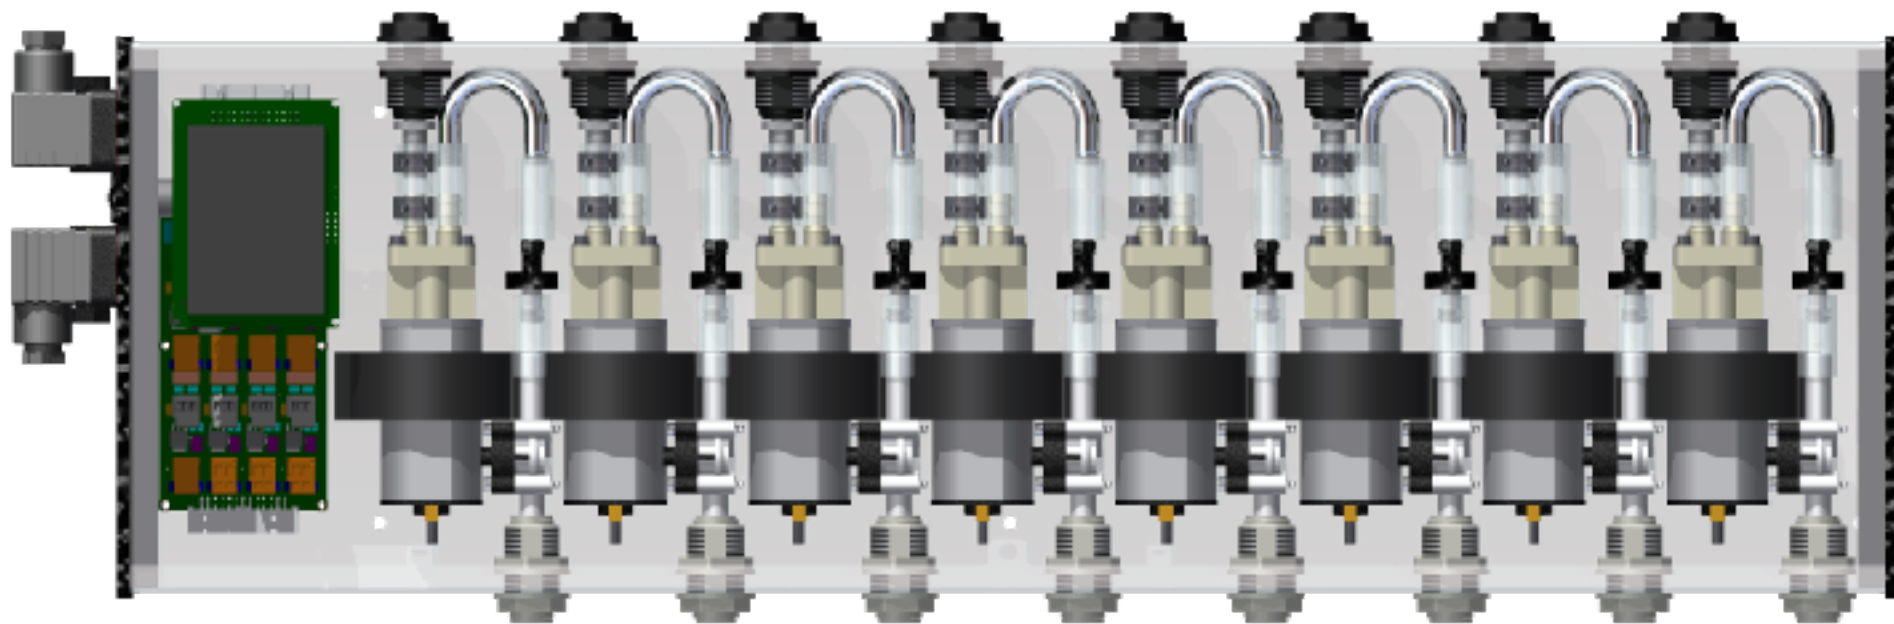

**It’s about gathering information in
certain contexts or even finding out
about new contexts and then
improving the system as a result.**

Internet of Things

Maybe!?

Let's gain some insights
